BookletChartTM

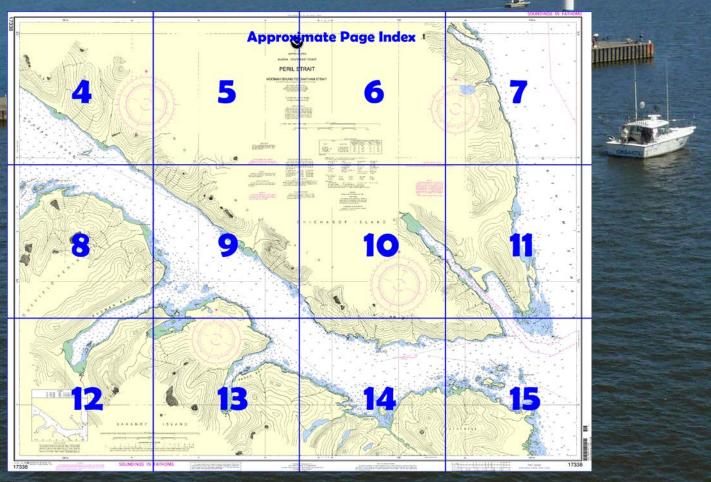

Peril Strait – Hoonah Sound to Chatham Strait NOAA Chart 17338

A reduced-scale NOAA nautical chart for small boaters When possible, use the full-size NOAA chart for navigation.

- Complete, reduced-scale nautical chart
- Print at home for free
- Convenient size
- Up-to-date with Notices to Mariners
- Compiled by NOAA's Office of Coast Survey, the nation's chartmaker

Published by the National Oceanic and Atmospheric Administration National Ocean Service Office of Coast Survey

What are Nautical Charts?

Nautical charts are a fundamental tool of marine navigation. They show water depths, obstructions, buoys, other aids to navigation, and much more. The information is shown in a way that promotes safe and efficient navigation. Chart carriage is mandatory on the commercial ships that carry America's commerce. They are also used on every Navy and Coast Guard ship, fishing and passenger vessels, and are widely carried by recreational boaters.

What is a BookletChart[™]?

This BookletChart is made to help recreational boaters locate themselves on the water. It has been reduced in scale for convenience, but otherwise contains all the information of the full-scale nautical chart. The bar scales have also been reduced, and are accurate when used to measure distances in this BookletChart. See the Note at the bottom of page 5 for the reduction in scale applied to this chart.

Whenever possible, use the official, full scale NOAA nautical chart for navigation. Nautical chart sales agents are listed on the Internet at http://www.NauticalCharts.NOAA.gov.

This BookletChart does NOT fulfill chart carriage requirements for regulated commercial vessels under Titles 33 and 44 of the Code of Federal Regulations.

Notice to Mariners Correction Status

This BookletChart has been updated for chart corrections published in the U.S. Coast Guard Local Notice to Mariners, the National Geospatial Intelligence Agency Weekly Notice to Mariners, and, where applicable, the Canadian Coast Guard Notice to Mariners. Additional chart corrections have been made by NOAA in advance of their publication in a Notice to Mariners. The last Notices to Mariners applied to this chart are listed in the Note at the bottom of page 7. Coast Pilot excerpts are not being corrected.

For latest Coast Pilot excerpt visit the Office of Coast Survey website at http://www.nauticalcharts.noaa.gov/nsd/searchbychart.php?chart=173 38.

(Selected Excerpts from Coast Pilot)
Broad Island, 200 feet high and wooded, is 2.1 miles NE of Otstoia Island and 0.5 mile off the N shore at the entrance to Hoonah Sound. Broad Island Light (57°35'09"N., 135°23'37"W.) is shown from a skeleton tower with a red and white diamond-shaped daymark on the W side of the island. Passage may be made between Broad Island and Chichagof Island to the N. Midchannel depths range from 40 to 60 fathoms; a shoal extends

0.2 mile NE from Broad Island, and a bar extends 0.2 mile out from the tree line on Chichagof Island into the channel.

On the N shore of Peril Strait, 2.5 miles E of Broad Island, a large landslide extends up the mountain side for several hundred feet. **Nismeni Cove**, on the E side of Nismeni Point, affords anchorage for small craft, with protection from S winds. To enter, keep the S shore aboard at a distance of about 200 yards to avoid the reef off Nismeni Point, and anchor in the middle of the cove about 0.3 mile from the head, in 6 fathoms, fair holding ground.

Peschani Point is a low wooded point on the S side 2.8 miles NW of Rodman Bay. The point is marked by a light.

Rodman Bay, on the S side 6 miles SE of Nismeni Point, offers good anchorage at its head. The wide mouth of the bay contains several shoal areas: Rodman Rock, with 1 fathom over it and marked by a buoy, is in the bay about 0.5 mile NW of the E point at the entrance; depths of 3 fathoms are found on an extensive shoal 0.9 mile W of Rodman Rock; shoals with depths of 1½ fathoms extend out to 0.5 mile from the W shore about 0.7 mile S of Point Elizabeth, and from the S shore about 0.3 mile W of the entrance to Appleton Cove. Safe passage to the head of the bay may be gained by passing 0.2 mile to the N and W of Rodman Rock Buoy 1 until SW of the buoy; continuing, stay 0.6 mile off the S shore until S of Point Elizabeth, and follow a midchannel course up the narrow part of the bay to its head.

Point Benham and **Point Elizabeth**, rounded wooded points, are, respectively, E and W of the entrance to Rodman Bay. Point Benham is marked by **Point Benham Light** (57°28'59"N., 135°11'52"W.), 19 feet above the water and shown from a square frame structure with a red and white diamond-shaped daymark.

Lauf Islands are on the E side near the head of Rodman Bay. The anchorage is 0.2 to 0.3 mile SW of Lauf Islands in 14 to 15 fathoms, soft bottom. A midchannel course leads safely to the anchorage. Flats extend 0.5 mile from the mouth of streams that enter the SE and SW corners of the head of the bay. SW winds blow with considerable force through the pass at the head of Rodman Bay.

Appleton Cove, about 1.5 miles inside Rodman Bay on the S shore, affords good anchorage and lee from seas for small craft though winds may be quite strong. The entrance channel is deepest E of center, about 0.1 mile off the E shore. Care should be taken to avoid a reef and foul area about 0.2 mile S of the SE corner of **Prince Island**.

False Island, small and wooded, is connected to Chichagof Island by a rocky isthmus that covers only on extreme high waters. A log storage area occupies most of a small cove formed by False Island and the mainland. The cove opens to the NW and has depths ranging from 2 to 6 fathoms and offers protection for small boats from storms from all but the NW. Care should be given to avoid the submerged ledge that extends about 100 yards NW from the NW tip of the island.

Saook Bay has its entrance on the S side of Peril Strait, 4 miles SE of Rodman Bay. **Paradise Flats** extend about 0.8 mile from its head. The bay affords a good and convenient anchorage with shelter from all winds. Water can be had from small streams.

Saook Point and Point Kennedy are the N and S points of the entrance to Saook Bay. A depth of 2½ fathoms exists 0.4 mile off shore and 0.5 mile E of Point Kennedy.

Lindenberg Harbor is a small cove on the W side of Lindenberg Head and affords protection from N and E. The anchorage is in the middle of the cove in 12 to 15 fathoms, with indifferent holding ground. A private mooring buoy is in the W side of the harbor. In 1976, a log storage area was occupying most of the N side of the harbor.

VHF Marine Radio channels for use on the waterways:

Channel 6 – Inter-ship safety communications.

Channel 9 – Communications between boats and ship-to-coast.

Channel 13 – Navigation purposes at bridges, locks, and harbors.

Channel 16 – Emergency, distress and safety calls to Coast Guard and others, and to initiate calls to other

vessels. Contact the other vessel, agree to another channel, and then switch.

Channel 22A – Calls between the Coast Guard and the public. Severe weather warnings, hazards to navigation and safety warnings are broadcast here. Channels 68, 69, 71, 72 and 78A – Recreational boat channels.

Getting and Giving Help — Signal other boaters using visual distress signals (flares, orange flag, lights, arm signals); whistles; horns; and on your VHF radio. You are required by law to help boaters in trouble. Respond to distress signals, but do not endanger yourself.

Distress Call Procedures

- Make sure radio is on.
- Select Channel 16.
- Press/Hold the transmit button.
- Clearly say: "MAYDAY, MAYDAY, MAYDAY."
- Also give: Vessel Name and/or Description; Position and/or Location; Nature of

Emergency; Number of People on Board.

- · Release transmit button.
- Wait for 10 seconds If no response Repeat MAYDAY call.

HAVE ALL PERSONS PUT ON LIFE JACKETS!

NOAA Weather Radio All Hazards (NWR) is a nationwide network of radio stations broadcasting continuous weather information directly from the nearest National Weather Service office. NWR broadcasts official Weather Service warnings, watches, forecasts and other hazard information 24 hours a day, 7 days a week.
